Applications

The semi automatic capsule filling machine is a special machine which is suitable for the medium, small pharmaceutical factory and hospital labs. It adopts programmable control system, touch panel operation, step-less transudation speed shift, and electronic counter. The machine can complete the actions of position, separation, filling and locking. The dosage is accurate and the operation is very easy to learn. The overall machine is made of stainless steel, and it is suitable for the capsules which filled with powder and grains.

Features

1. It is much easier and more convenient to operate the new semi-auto capsule filling machine with a PLC, and it looks more high-grade.
2. It uses SS304 instead of copper to make the capsule dispensing part. This change enhances the precision of capsule loading and reduces friction. Not only does it improve the producing efficiency, but also it extends the life of the machine.
3. The capsule locking parts on the new machine is horizontal, and it adopts automatic pneumatic principle. The design can prevent the powders crashing effectively to improve the capsule quality. It also reduces manpower and makes the operation more convenient.

Main Technical Parameter

Model	DTJ-V
Capsule size	No. 00#-5# & Security Capsule A-E
Capacity	Max. 12500 pcs/h
Power supply	380V/220V 50HZ 2.2KW
Vacuum pump	XD-040(40m3/h)
Capacity of air compressor	0.1 m3/min
Noise	<60dB(A)
Overall dimensions:(mm)	1350×700×1600
Packing dimension:(mm)	1800×800×1800
Net weight:(Kg)	330
Gross weight:(Kg)	400
